

Essential Well Service ("EWS") was re-branded in September 2009 with the combination of Puma Well Service, Cardinal Well Services and Millard Oilfield Services. These three entities have been in operation between 10 and 40 years.

EWS has a full line of well service equipment to handle a variety of oilfield service operations. The rigs are all free standing, well maintained and regularly certified. The fleet can work in depths ranging from 500m to 3500m. EWS maintains six boilers and a range of additional equipment (power swivels, Class 3 blowout preventers with accumulators, pipe racks, matting, etc.).

EWS is based out of Medicine Hat, AB with field offices and a certified mechanical repair shop in Brooks, AB. Its rigs operate throughout central and southern Alberta, southern Saskatchewan and Manitoba.

Essential Energy Services Trust units trade on the Toronto Stock Exchange under the symbol ESN.UN.

For additional information, please visit our website at www.essentialenergy.ca.
